

## ***IN IDEAL DRY HAY CONDITIONS***

**YOU CAN CHOOSE TO PUT YOUR HAY IN A HAY SHED OR BARN IF THERE IS ONE AT THE FIELD LOCATION.**

**IF NOT, YOU HAVE THE ADDED EXPENSE OF TRANSPORTATION TO WHEREVER THE SHED IS.**

**ADDITIONALLY, THERE IS THE COST OF BUILDING THE SHED, INSURANCE, TAXES, AND UPKEEP.**

**IF YOUR HAY DOESN'T SELL, IS THERE ROOM FOR THE NEXT CUTTING? AND THE NEXT?  
AND THE NEXT?**

***WITH A STINGER CUBE-LINE 4000 BALE WRAPPER YOU CAN NEVER RUN OUT OF ROOM.***

**YOU CAN CHOOSE THE TARP METHOD.**

**TARPING MAY SEEM LESS EXPENSIVE ON THE SURFACE, BUT WHEN CONSIDERING**

- **THE TARP NEVER FITS THE NUMBER OF BALES IN THE STACK.**
- **THE EXPENSE OF WIND DAMAGE AND THE CONSTANT RETIGHTENING OF THE TARPS.**
- **THE EXPENSE OF UNTARPING AND RETARPING EVERY TIME YOU NEED ACCESS TO THE STACK**
- **THE LOSS OF REVENUE DUE TO BOTTOM BALE DAMAGE, SHRINKAGE AND EDGE LOSSES.**
- **THE RISK OF INJURY CLIMBING ON AND OFF OF THE STACKS.**

## ***TARPS ARE NO BARGAIN***

**YOU CAN CHOOSE THE STINGER CUBE-LINE 4000 BALE WRAPPER; A SAFE, INEXPENSIVE AND EASY ACCESS WAY TO STORE YOUR HAY RIGHT AT THE EDGE OF THE FIELD.**

**AS MANY BALES AS YOU WANT, AS MANY TIMES AS YOU WANT.**

**WITH THE STINGER CUBE-LINE 4000 BALE WRAPPER, THE QUALITY AND QUANTITY OF YOUR HAY WILL BE MUCH IMPROVED EVEN AFTER MONTHS OF STORAGE WHEN COMPARED WITH TARPING.**

***WITH THE STINGER CUBE-LINE 4000 BALE WRAPPER***

***YOU HAVE A CHOICE***
