

## ***WHAT IS BALAGE?***

**IT IS HAY THAT IS CUT AND BALED WITHIN THE FIRST DAY OR TWO PREFERABLY BEFORE A RAIN; USUALLY AT 30% TO 50% MOISTURE AND THEN WRAPPED AND SEALED IN A WRAP LINE. THE HIGH MOISTURE AND LIMITED OXYGEN ENVIRONMENT IN THE WRAP LINE WILL ALLOW THE HAY TO ENSILE AND BECOME A VERY PALATABLE HIGH QUALITY FEED. YOU COULD SAY THAT THE STINGER 4000 WRAPPER IS A PORTABLE SILO FOR HIGH QUALITY FEED THAT PRODUCES LESS WASTE AND MORE POUNDS OF MILK OR MEAT.**

## ***IT OFFERS ONE MORE CHOICE FOR TODAY'S HAY FARMER WHO NEEDS OPTIONS!***

**WHEN YOU GET TO THE END OF THE DAY YOU LOOK BACK AND SEE THAT WHERE YOU HAD A CHOICE, YOU HAD CONTROL AND WITH THAT CONTROL YOU COULD MAKE MORE PROFIT.**

**THE STINGER CUBE-LINE 4000 BALE WRAPPER DOES NOT GIVE YOU BALES AS PRETTY AS A HAY SHED—NOR DOES IT COST AS LITTLE AS TARPS AND IT'S NOT AS EASY AS DOING NOTHING.**

## ***BUT, IF PROFIT IS YOUR GOAL,***

**THE STINGER CUBE-LINE 4000 BALE WRAPPER DOES GIVE YOU A SYSTEM WITH THE GREATEST CHOICES TO MANAGE AROUND WEATHER AND TIME CONSTRAINTS. THE STINGER CUBE-LINE 4000 BALE WRAPPER DOES GIVE YOU MORE TONS OF HIGHER QUALITY HAY TO SELL.**

**A CHOICE TO MANAGE WEATHER LOSSES IS A CHOICE TO MAKE MORE PROFIT.**

***WITH THE STINGER CUBE-LINE 4000 BALE WRAPPER***

***THERE IS MORE CHOICE***
