

WHAT ABOUT WHEN WEATHER THREATENS

YOU JUST PUT DOWN A QUARTER-CIRCLE OF IRRIGATED DAIRY HAY BECAUSE THE WEATHERMAN SAID HOT AND DRY FOR THE NEXT THREE DAYS; ONLY NOW IT'S EVENING AND HE SUDDENLY THINKS THERE IS A 50% CHANCE OF RAIN TOMORROW EVENING AND AN 80% CHANCE TOMORROW NIGHT.

WHAT ARE YOUR CHOICES NOW?

**WITHOUT THE STINGER CUBE-LINE 4000 BALE WRAPPER,
THERE REALLY ARE NO CHOICES!**

THERE WILL BE A 15%, OR GREATER LOSS DUE TO WEATHER DAMAGE.

YOUR DAIRY HAY IS NOW REGULAR HAY. IF THE WEATHER TURNS OFF HOT AND DRY AFTER THE RAIN YOU MAY NOT LOSE ANYTHING ON THE NEXT CUTTING, BUT IF IT DOESN'T YOU WON'T GET THE IRRIGATION BACK ON IN A TIMELY FASHION. THE NEXT CUTTING IS GOING TO BE TRACKED DOWN AND YOU MAY HAVE STAND DAMAGE. NO MATTER WHAT, YOU'RE GOING TO LOSE MONEY.

OR

IF YOU CHOOSE THE STINGER CUBE-LINE 4000 BALE WRAPPER, YOU WILL RAKE IT IN THE MORNING, BALE IT IN THE AFTERNOON AT 30% TO 50% MOISTURE, WRAP IT TIGHT, AND KNOW THAT YOU HAVE TOP QUALITY BALAGE, NO FIELD LOSSES, AND THE NEXT CUTTING IS OFF AND GROWING.

WITH THE STINGER CUBE-LINE 4000 BALE WRAPPER

YOU HAVE A CHOICE!
