- ✓ 12 - 3x3 Stacked 6 high
- ✓ 120 -140 Bales per hour to one corner of the section
- ✓ Barn clearance - 20 ft

BUILT FROM THE GROUND UP

The Stinger Stacker 6500 gives unmatched weight distribution, performance and versatility compared to any other bale stacker on the market. Built from the ground up with the all-new Stinger Specialized TerraFrame M195 Chassis, the Stinger Stacker 6500 is the only self propelled bale stacker that does not exceed manufacturer axle or tire ratings. The long wheel base, and center mounted air ride cab gives unmatched ride quality for those long days and nights. Every Stinger Stacker 6500 comes standard with large flotation tires, LED light package, electric reversing fan package, and poly rails. Options include Lincoln Autolube and Bale Bundle rails.

- ✓ 10 - 4x4 (Agco Baler Hay or Straw)
- ✓ 8 - 4x4 Bales
- ✓ Barn clearance needed: 22ft (23.5 ft. 7 high)

IN A CLASS OF ITS OWN

The Stinger Stacker 8500 provides unmatched speed, durability, and performance compared to any other bale stacker on the market. The first commercial bale stacker designed specifically for the expanding market of Ultra dense square bales. The Stinger Stacker 8500 combines the most popular and proven features of Stingers of the past with the added performance and design to handle more bales at less cost than any other bale wagon in the world. Increased capacity, increased flotation, increased traction, speed, and horsepower. The Stinger Stacker 8500 is simply like no other and stands in a class of its own.

- ✓ Front Wheels and Tires:
BKT 600/50 R22.4 Flotation Tires, Steel 1/2" Hub 22.5 x 16 10 Hole Powder coated white wheel

BKT 750/45 R22.5 Flotation Tires, Steel 1/2" Hub 22.5 x 16 10 Hole Powder coated White Wheel
- ✓ Fuel Capacity:
120 Gal
- ✓ TRANSMISSION:
Allison RDS4000 (close ratio)
6-Speed with Joystick Control
- ✓ Warranty:
Stacker - 2yr, Chassis - 2yr,
Engine & Transmission - 3yr/3000 hours

STINGER TERRAFRAME

TerraFrame XL M160

Designed for the harshest terrains, The TerraFrame XL M160 is the bedrock of the Stinger model 8500 Stacker. Featuring a 456-horsepower Caterpillar engine with electric fan package. With all that power, it can efficiently transport the heaviest of payloads.

DESIGNED FOR PERFORMANCE

Stinger TerraFrame Designs offer more opportunities for customization than the typical OTR (over-the-road) truck or custom chassis manufacturer. That's because most of the limitations that apply to building a production OTR truck simply do not apply when it comes to our Stinger Specialized TerraFrame Chassis designs that are built from the ground up. Our designs are only built for the heavy duty, off-road custom market. Each unit is designed specifically for its unique function, use and environment. Using our decades of experience building and operating off-road equipment we strive to seamlessly blend the use of new technologies and products with as many common, time tested and proven components and designs.

TerraFrame Max M195

Since the 1990s, a cornerstone of Stinger has been the design and development of our off-road hay loader chassis. As more hay equipment manufacturers have abandoned custom "farm built" designs in favor of large volume, off-the-shelf outsourced designs, Stinger remains committed to the principals our family established and maintained on our own 140 year farming operation. The Stinger Terra Frame Chassis: purpose-built to exceed our customer's expectations.
